Select All Deselect All

1. Multifunctional synchronized measurement network [power systems]

Fardanesh, B.; Zelingher, S.; Sakis Meliopoulos, A.P.; Cokkinides, G.; Inglesor

Computer Applications in Power, IEEE

Volume 11, Issue 1, Jan. 1998 Page(s):26 - 30

Digital Object Identifier 10.1109/67.648495

AbstractPlus | Full Text: PDF(2380 KB) | IEEE JNL

Rights and Permissions

2. An architecture for monitoring, visualization, and control of gigabit netwo

Parulkar, G.; Schmidt, D.; Kraemer, E.; Turner, J.; Kantawala, A.;

Network, IEEE

Volume 11, Issue 5, Sept.-Oct. 1997 Page(s):34 - 43

Digital Object Identifier 10.1109/65.620520

AbstractPlus | Full Text: PDF(2608 KB) | IEEE JNL

Rights and Permissions

3. Modeling of local controllers in distribution network applications

Roytelman, I.; Ganesan, V.;

Power Delivery, IEEE Transactions on

Volume 15, Issue 4, Oct. 2000 Page(s):1232 - 1237

Digital Object Identifier 10.1109/61.891508

AbstractPlus | References | Full Text: PDF(92 KB) | IEEE JNL

Rights and Permissions

4. Geographic extension of HIPPI channels via high speed SONET

Hughes, J.P.; Franta, W.R.;

Network, IEEE

Volume 8, Issue 3, May-June 1994 Page(s):42 - 53

Digital Object Identifier 10.1109/65.283932

AbstractPlus | Full Text: PDF(3800 KB) IEEE JNL

Rights and Permissions

5. Fast intelligent battery charging: neural-fuzzy approach

Ullah, Z.; Burford, B.; Dillip, S.;

Aerospace and Electronic Systems Magazine, IEEE

Volume 11, Issue 6, June 1996 Page(s):26 - 34

Digital Object Identifier 10.1109/62.500207

AbstractPlus | Full Text: PDF(396 KB) IEEE JNL Rights and Permissions

6. Rate regulation with feedback controller in ATM networks-a neural netwo

Liu, Y.-C.; Douligeris, C.;

Selected Areas in Communications, IEEE Journal on Volume 15, Issue 2, Feb. 1997 Page(s):200 - 208

Digital Object Identifier 10.1109/49.552070

<u>AbstractPlus</u> | <u>References</u> | Full Text: <u>PDF</u>(244 KB) IEEE JNL Rights and Permissions

7. Network switching and voltage evaluation using an expert system in AC i

Chang, C.S.; Chan, T.T.; Lee, K.K.;

Electric Power Applications, IEE Proceedings B [see also IEE Proceedings-Ele Applications]

Volume 139, Issue 1, Jan. 1992 Page(s):1 - 12

AbstractPlus | Full Text: PDF(740 KB) | IET JNL

8. Power line sensornet - a new concept for power grid monitoring

Yi Yang; Divan, D.; Harley, R.G.; Habetler, T.G.;

Power Engineering Society General Meeting, 2006. IEEE

18-22 June 2006 Page(s):8 pp.

Digital Object Identifier 10.1109/PES.2006.1709566

AbstractPlus | Full Text: PDF(440 KB) IEEE CNF

Rights and Permissions

9. Modeling of local controllers in distribution network applications

Roytelman, I.; Ganesan, V.;

Power Industry Computer Applications, 1999. PICA '99. Proceedings of the 21:

International Conference

16-21 May 1999 Page(s):161 - 166

Digital Object Identifier 10.1109/PICA.1999.779399

AbstractPlus | Full Text: PDF(620 KB) IEEE CNF

Rights and Permissions

10. Policy-based mobile ad hoc network management

Chadha, R.; Hong Cheng; Yuu-Heng Cheng; Chiang, J.; Ghetie, A.; Levin, G.; Policies for Distributed Systems and Networks, 2004. POLICY 2004. Proceedi

International Workshop on

7-9 June 2004 Page(s):35 - 44

Digital Object Identifier 10.1109/POLICY.2004.1309148

AbstractPlus | Full Text: PDF(481 KB) | IEEE CNF

1 Link and channel measurement: A simple mechanism for capturing and replaying

wireless channels

Glenn Judd, Peter Steenkiste

August 2005 Proceeding of the 2005 ACM SIGCOMM workshop on Experimental approaches to wireless network design and analysis E-WIND '05

Publisher: ACM Press

Full text available: pdf(6.06 MB)

Additional Information: full citation, abstract, references, index terms

Physical layer wireless network emulation has the potential to be a powerful experimental tool. An important challenge in physical emulation, and traditional simulation, is to accurately model the wireless channel. In this paper we examine the possibility of using on-card signal strength measurements to capture wireless channel traces. A key advantage of this approach is the simplicity and ubiquity with which these measurements can be obtained since virtually all wireless devices provide the req ...

Keywords: channel capture, emulation, wireless

Special issue: Al in engineering

D. Sriram, R. Joobbani

April 1985 ACM SIGART Bulletin, Issue 92

Publisher: ACM Press

Full text available: pdf(8.79 MB)

Additional Information: full citation, abstract

The papers in this special issue were compiled from responses to the announcement in the July 1984 issue of the SIGART newsletter and notices posted over the ARPAnet. The interest being shown in this area is reflected in the sixty papers received from over six countries. About half the papers were received over the computer network.

3 Special section: Reasoning about structure, behavior and function

B. Chandrasekaran, Rob Milne

July 1985 ACM SIGART Bulletin, Issue 93

Publisher: ACM Press

Full text available: pdf(5.13 MB)

Additional Information: full citation, abstract, references, citings

The last several years' of work in the area of knowledge-based systems has resulted in a deeper understanding of the potentials of the current generation of ideas, but more

importantly, also about their limitations and the need for research both in a broader framework as well as in new directions. The following ideas seem to us to be worthy of note in this connection.

4 Practically accomplishing immersion: cooperation in and for virtual environments John Bowers, Jon O'Brien, James Pycock

November 1996 Proceedings of the 1996 ACM conference on Computer supported cooperative work CSCW '96

Publisher: ACM Press

Full text available: pdf(1.44 MB) Additional Information: full citation, references, citings, index terms

Keywords: CSCW, ethnography, evaluation, interaction analysis, research methods, studies of work, virtual reality

Toward best maintenance practices in communications network management Faouzi Kamoun

September 2005 International Journal of Network Management, Volume 15 Issue 5 Publisher: John Wiley & Sons, Inc.

Full text available: 🔁 pdf(132.43 KB) Additional Information: full citation, abstract, references, index terms

Best maintenance practices in communications networks management are benchmarking standards that, if carefully implemented, will enhance the integrity, reliability and maintenance costs of communications networks. This paper defines best maintenance practices in communications network management within a concise framework encompassing measurable performance-level goals as well as methods and procedures needed to achieve these goals. The best maintenance practice recommendations of this paper cov ...

Ghosts in the network: distributed troubleshooting in a shared working environment

Yvonne Rogers

December 1992 Proceedings of the 1992 ACM conference on Computer-supported cooperative work CSCW '92

Publisher: ACM Press

Additional Information: full citation, references, citings, index terms Full text available: pdf(1.36 MB)

Keywords: breakdowns, distributed problem-solving, ethnographic analysis, networked technologies

7 A hierarchical multicast monitoring scheme

November 2000 Proceedings of NGC 2000 on Networked group communication COMM '00

Publisher: ACM Press

Full text available: T pdf(1.29 MB) Additional Information: full citation, abstract, references, index terms

Deployment of multicast routing services in corporate networks and Internet Service Providers is still tentative. Among other problems, there is a lack of monitoring and management tools and systems. Previous work in multicast management has failed to address the scalability problem present in multicast fault isolation and reporting. We propose a hierarchical, passive monitoring scheme, HPMM, that relies on a series of predeployed, self-organized monitoring daemons. With HPMM, fault message ...

8 From service configuration through performance monitoring to fault detection: implementing an integrated and automated network maintenance platform for enhancing wide area transaction access services

Symeon Papavassiliou, Mike Pace

September 2000 International Journal of Network Management, Volume 10 Issue 5

Publisher: John Wiley & Sons, Inc.

Full text available: 🔁 pdf(961.05 KB) Additional Information: full citation, abstract, references, index terms

The design and implementation of integrated and automated network-service management platforms that can seamlessly configure services, monitor service-network performance, and detect network faults are of great importance and interest to the service and network providers. In this paper we describe a set of integrated Operations Support Systems & Ipar; OSS & rpar; that implement proactive network maintenance process in Wide Area Transaction Access Services. Copyright © 2000 John ...

9 Getting others to get it right: an ethnography of design work in the fashion industry

James Pycock, John Bowers

November 1996 Proceedings of the 1996 ACM conference on Computer supported cooperative work CSCW '96

Publisher: ACM Press

Additional Information: full citation, references, citings, index terms Full text available: pdf(1.59 MB)

Keywords: CSCW, design, ethnography, field studies, studies of work, the fashion industry, virtual reality

10 Knowledge-based monitoring and control: an approach to understanding behavior of

TCP/IP network protocols B. L. Hitson

> August 1988 ACM SIGCOMM Computer Communication Review, Symposium proceedings on Communications architectures and protocols SIGCOMM **'88**, Volume 18 Issue 4

Publisher: ACM Press

Additional Information: full citation, abstract, references, citings, index Full text available: pdf(1.29 MB) terms

Complex, dynamic, and evolving network environments present difficult challenges for monitoring and control. We have encoded some of the expertise of human networking experts into a knowledge-based system that uses production rules and opportunistic scheduling, and have been using this system to better understand the behavior of the TCP/IP protocols and the applications that use them. Novel aspects of this research include understanding how to encode knowledge from this domain, and how to r ...

11 Industrial track: aerospace applications: Launch commit criteria monitoring agent

Glenn S. Semmel, Steven R. Davis, Kurt W. Leucht, Dan A. Rowe, Andrew O. Kelly, Ladislau Bölöni

July 2005 Proceedings of the fourth international joint conference on Autonomous agents and multiagent systems AAMAS '05

Publisher: ACM Press

Full text available: pdf(500.45 KB) Additional Information: full citation, abstract, references, index terms

The Spaceport Processing Systems Branch at NASA Kennedy Space Center has developed and deployed a software agent to monitor the Space Shuttle's ground processing telemetry stream. The application, the Launch Commit Criteria Monitoring Agent,

increases situational awareness for system and hardware engineers during Shuttle launch countdown. The agent provides autonomous monitoring of the telemetry stream, automatically alerts system engineers when predefined criteria have been met, identifies limi ...

**Keywords**: agent, expert system, rule-based programming

12 Service architecture: Crona: an architecture and library for creation and monitoring of

WS-agreents

Heiko Ludwig, Asit Dan, Robert Kearney

November 2004 Proceedings of the 2nd international conference on Service oriented computing ICSOC '04

Publisher: ACM Press

Full text available: pdf(118.30 KB)

Additional Information: full citation, abstract, references, citings, index terms, review

Using services across domain boundaries, be they organizations or self-managing components of large distributed systs, requires the setup of an agreent between the parties involved, defining the terms of the service including interfaces, security and Quality of Service (QoS) properties. In an on-dand environment in which services are contracted on a short notice, the establishment of an agreent as well as the setup of agreement-fulfilling and monitoring systs of the parties involved must be s ...

Keywords: WS-agreement, contract, contract management, grid service, quality of service, template, web service

13 Network and service management for wide-area electronic commerce networks Symeon Papavassiliou

March 2001 International Journal of Network Management, Volume 11 Issue 2

Publisher: John Wiley & Sons, Inc.

Full text available: pdf(416.91 KB) Additional Information: full citation, abstract, references, index terms

This paper focuses on the effective management of wide‐ area electronic commerce networks supporting services and applications that require high availability and reliability as well as fast reconstitution time, in the event of failures. Copyright © 2001 John Wiley & Sons, Ltd.

14 Business processes and conversations: Decentralized orchestration of composite

web services

Girish B. Chafle, Sunil Chandra, Vijay Mann, Mangala Gowri Nanda May 2004 Proceedings of the 13th international World Wide Web conference on Alternate track papers & posters WWW Alt. '04

Publisher: ACM Press

Additional Information: full citation, abstract, references, citings, index Full text available: pdf(166.96 KB) terms

Web services make information and software available programmatically via the Internet and may be used as building blocks for applications. A composite web service is one that is built using multiple component web services and is typically specified using a language such as BPEL4WS or WSIPL. Once its specification has been developed, the composite service may be orchestrated either in a centralized or in a decentralized fashion. Decentralized orchestration offers perf ...

Keywords: BPEL4WS, code partitioning, composite web services, decentralized orchestration

15 Knowledge based fault management for OSI networks

Celia A. Joseph, A. Sherzer, K. Muralidhar

June 1990 Proceedings of the 3rd international conference on Industrial and engineering applications of artificial intelligence and expert systems - Volume 1 IEA/AIE '90

Publisher: ACM Press

Full text available: pdf(826.21 KB)

Additional Information: full citation, abstract, references, citings, index terms

The OSI Fault Management system (OSIFaM) is an evolving knowledge-based system for fault management of Open System Interconnection (OSI) networks. Our goal is to develop a knowledge-based tool that will reduce the expertise needed to recognize, diagnose and correct faults in OSI networks. For our first implementation, we are focusing on MAP 3.0 networks. This paper provides an overview of fault management in general, a brief survey of other fault management developments, the characteristics ...

16 Extending the RMON matrix group to provide network layer statistics

Gerald A. Winters, Toby J. Teorey

October 1994 Proceedings of the 1994 conference of the Centre for Advanced Studies on Collaborative research CASCON '94

Publisher: IBM Press

Full text available: pdf(179.96 KB)

Additional Information: full citation, abstract, references, citings, index terms

The Simple Network Management Protocol SNMP is an application level protocol developed for the Internet suite of protocols. It is a connectionless protocol that provides a basic, easily implemented network-management tool for TCP/IP-based environments. With the current Internet management information base standard for SNMP (MIB-II) a network manager can obtain information that is local to a managed device. However, a manager cannot easily learn about traffic as a whole on the LAN.A valuable addi ...

17 Specification and implementation of exceptions in workflow management systems

Fabio Casati, Stefano Ceri, Stefano Paraboschi, Guiseppe Pozzi

September 1999 ACM Transactions on Database Systems (TODS), Volume 24 Issue 3

Publisher: ACM Press

Full text available: pdf(250.40 KB)

Additional Information: full citation, abstract, references, citings, index terms

Although workflow management systems are most applicable when an organization follows standard business processes and routines, any of these processes faces the need for handling exceptions, i.e., asynchronous and anomalous situations that fall outside the normal control flow. In this paper we concentrate upon anomalous situations that, although unusual, are part of the semantics of workflow applications, and should be specified and monitored coherently; in most real-life applica ...

**Keywords**: active rules, asynchronous events, exceptions, workflow management systems

18 Routing I: Fixing BGP, one as at a time

Jaideep Chandrashekar, Zhi-Li Zhang, Hal Peterson

September 2004 Proceedings of the ACM SIGCOMM workshop on Network troubleshooting: research, theory and operations practice meet malfunctioning reality NetT '04

Publisher: ACM Press

Full text available: 📆 pdf(246.71 KB) Additional Information: full citation, abstract, references, index terms

Debugging inter-domain routing problems on the Internet is notoriously hard. This is partly because BGP updates carry no information about the events that trigger them, and also because operation is highly distributed and complex, lacking a central point of control or authority. These factors have impeded the development of tools that can help in the diagnosis and troubleshooting of routing problems. Consequently, the dynamic behaviour of BGP is not well understood, even though it forms a cri ...

Keywords: BGP, convergence, routing

19 An agent-based approach for supporting cross-enterprise workflows Liangzhao Zeng, Anne Ngu, Boualem Benatallah, Milton O'Dell

January 2001 Proceedings of the 12th Australasian database conference ADC '01

Publisher: IEEE Computer Society

Full text available: pdf(774.93 KB) Additional Information: full citation, abstract, references, citings, index terms Publisher Site

In order to support global competitiveness and rapid market responsiveness, virtual enterprises need to efficiently integrate different organization's workflows to provide customized services. Currently, most of the integrations are case-based which have high setup cost and involve time consuming low level programming. Cross-enterprise workflow that is able to streamline and coordinate business processes across organizations in dynamic Web environment provides a low cost and flexible solution. W ...

20 Studies of systems management: Design guidelines for system administration tools developed through ethnographic field studies

Eben M. Haber, John Bailev

March 2007 Proceedings of the 2007 symposium on Computer human interaction for the management of information technology CHIMIT '07

Publisher: ACM Press

Full text available: Topological policy additional Information: full citation, abstract, references, index terms

Information Technology system administrators (sysadmins) perform the crucial and never-ending work of maintaining the technical infrastructure on which our society depends. Computer systems grow more complex every year, however, and the cost of administration is an ever increasing fraction of total system cost - IT systems are growing harder to manage. To better understand this problem, we undertook a series of field studies of system administration work over the past four years, visiting a v ...
